Compression Resistance

Content Hugging and Compression Resistance

```
func setContentHuggingPriority(  
    priority: UILayoutPriority,  
    forAxis axis: UILayoutConstraintAxis  
)
```

```
func setContentCompressionResistancePriority(  
    priority: UILayoutPriority,  
    forAxis axis: UILayoutConstraintAxis  
)
```

Content Hugging and Compression Resistance

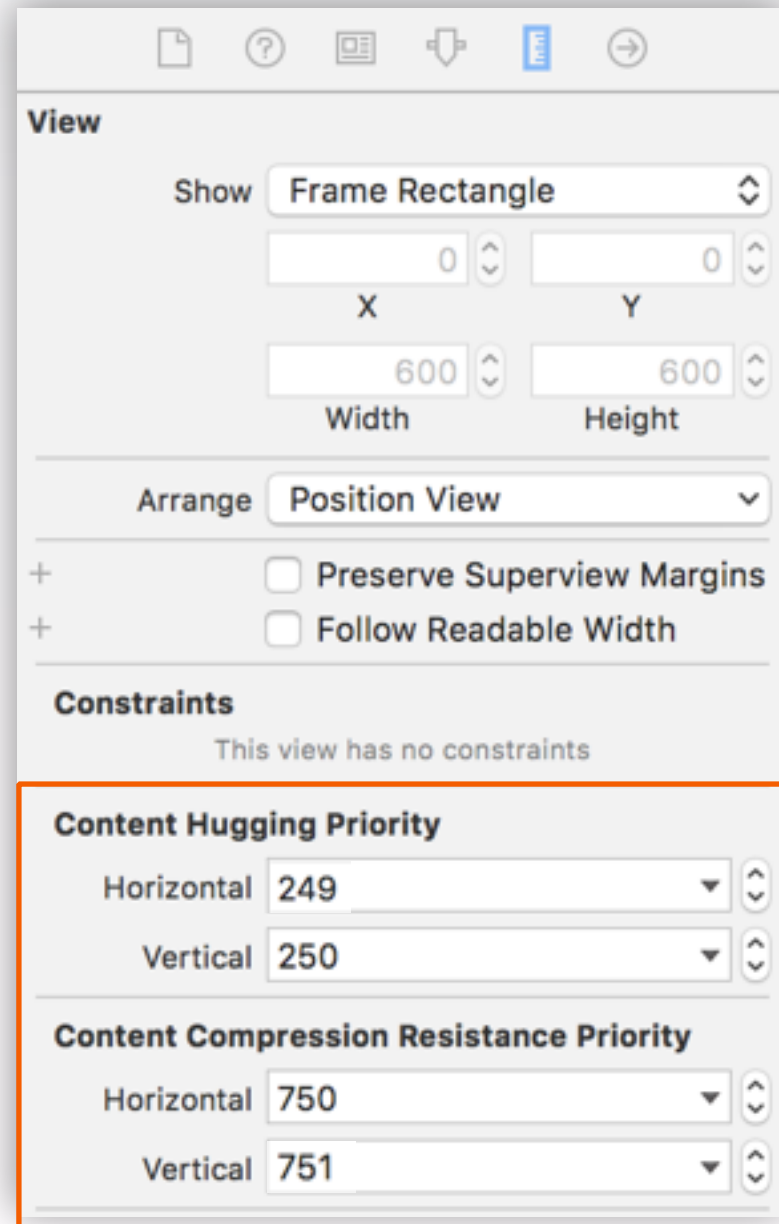

```
// NSLayoutConstraint
```

```
UILayoutConstraint.Horizontal  
UILayoutConstraint.Vertical
```

```
// UILayoutPriority
```

```
UILayoutPriorityRequired = 1000  
UILayoutPriorityDefaultHigh = 750  
UILayoutPriorityDefaultLow = 250  
UILayoutPriorityFittingSizeLevel = 50
```

Content Hugging and Compression Resistance

```
view.setContentHuggingPriority(  
    UILayoutPriorityDefaultLow - 1,  
    forAxis: NSLayoutConstraint.Horizontal  
)
```

```
view.setContentCompressionResistancePriority(  
    UILayoutPriorityDefaultHigh + 1,  
    forAxis: NSLayoutConstraint.Vertical  
)
```

Content Hugging and Compression Resistance

```
view.contentHuggingPriorityForAxis(  
    UILayoutConstraintAxis.Horizontal  
)
```

```
view.contentCompressionResistancePriorityForAxis(  
    UILayoutConstraintAxis.Vertical  
)
```

```
override func viewForBaselineLayout() -> UIView {  
    //The View you wish to be the baseline  
}
```
