Overview

Motivation

ThemeBuilder

Motivation

Encapsulates default configuration values

- Create objects which require many configuration values

- Use when you rarely change most default values

Customizable default configuration values

- Callers can change the defaults

Builder

Separates the creation of an object from its configuration. Simplifies the creation of objects which need many default values.

ThemeBuilder Demo

Summary

Builder

- Use it when initializing new instances of a type requires many values

- And the majority of configuration defaults must not be changed
